Email: mgilpin@kasap.org

Sexual Assault Response Team (SART)

SARTs use a multidisciplinary approach to investigate and treat victims of sexual violence and may consist of law enforcement, advocates, prosecutors, crime labs, and a Sexual Assault Nurse Examiner.

SARTs utilize a victim centered approach, providing the victim with compassionate, efficient and skilled care and support throughout the criminal justice process.

SART members receive advanced training and protocol guidelines which improves the quality of evidence and strengthens the evidence admissibility in court. Reporting and conviction rates have increased in states where SART models are in place.

Sexual Assault Nurse Examiner (SANE)

A SANE is a registered nurse who has received advanced education and training regarding sexual assault and forensic nursing. SANEs complete a medico-legal examination, collect and preserves evidence, applies critical thinking skills and is considered an expert witness in the judicial system.

SANE credentials are issued by the Ky Board of Nursing to RNs who complete this 40-hour didactic course and also complete the 60-hour clinical requirements. The 60-hour clinical study is self-guided and must be completed within 12 months following the didactic training. RNs are individually responsible for making arrangements to complete all requirements of the 60 hours including the speculum insertion clinical time. For more information about the 60 hours of self-guided clinical, please visit: www.kasap.org/regulation_for_certification.html or contact Melissa Gilpin at mgilpin@kasap.org
